

Control your air conditioner
with your smartphone.

 Melissa saves you up to
30% on your electricity bill.

www.mclimate.eu

Control your A/C with your smartphone.

After you have connected Melissa to your home Wi-Fi network, you will be able to send her commands and receive information about the current temperature and humidity at home through the Internet. When Melissa receives your command, she sends Infrared signals to your A/C to change its settings.

Geolocation based turn On/Off of your A/C

Melissa turns your A/C ON or OFF depending on your location, so you can always enjoy the perfect temperature when you're home.

Setting timers has never been easier.

With our intuitive app interface even grandma can create multiple timers with ease.

Make your A/C energy efficient.

Melissa helps you save money by reducing your A/C's energy consumption with up to 30%.
